

"I don't even recognize my mouth anymore. Aquaoral isn't liquid gold, it's liquid normal. I can confidently say it's like nothing else out there."

Julia T., Sjögren's Patient

A Different Option for the Treatment of Xerostomia

Aquaoral Protective Oral Spray

Rapid, effective, prescription-strength relief of symptoms in a convenient, discreet spray.

- Patented, lipid-based spray moistens and lubricates the mucosa and creates a barrier that protects against mucosal damage and tooth decay
- Provides relief for up to 6 hours—effectiveness compounds with continued use
- Improves patients' ability to chew, taste, swallow, sleep, and speak

Prescription Ordering Made Easy

Aquaoral is available through Transition Pharmacy Services, a direct mail pharmacy. We offer several different ways to prescribe Aquaoral.

- Submit prescriptions by e-prescribing or fax
- Patients can order online
- An in-office stocking model is available to healthcare professionals at a discounted rate

The prevalence of xerostomia continues to rise with the increasing number of conditions that cause it.

- Oral, head and neck, thyroid cancer, and radiation treatment
- Sjögren's Syndrome
- Other diseases such as diabetes, neurological diseases, rare diseases
- Swallowing Disorders
- Medication side effects
- Polypharmacy
- C-PAP machines
- Lifestyle choices such as marijuana, tobacco, vaping, and alcohol

Many patients have found that over-the-counter products are not enough to combat their dry mouth. In three clinical trials, Aquaoral's lipid-based technology was shown to provide significant benefits when compared to competitors.
