

How to get the most out of Aquoral

SHAKE. SPRAY. SPREAD.

A protective coating is formed by spreading Aquoral with the tongue or finger around the oral mucosa.

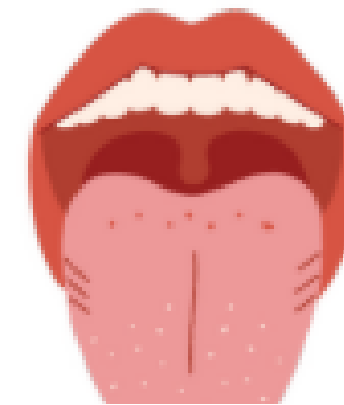

1. Shake gently.

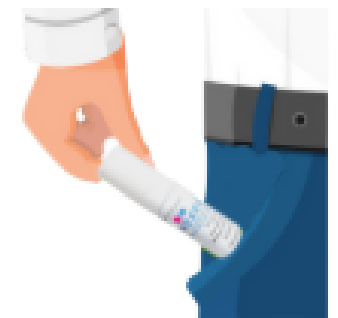

2. Pump may require priming for initial use.

3. Spray one dose (two sprays in the mouth).

4. Spread product onto inflamed and/or dry area of the mouth with the tongue.

5. Convenient on the go application.
